

PRELIMINARY RISK & SECURITY LOG

PART 1: RISK ASSESSMENT KEY

Use this standard key to score your risks.

Score	Likelihood (1-5)	Impact (1-5)
1-4	Low: Keep under review.	Minor: Inconvenient but not critical.
5-12	Medium: Needs a plan.	Moderate: Requires changes to design/code.
15-25	High/Extreme: Urgent action required.	Catastrophic: Project failure / Data Breach.

Student Name: Muhammad Aarim Rana
Role: Software Developer
Group Name: The Best Coders

Ref ID	Risk Category	Risk Description / Threat	Likelihood (1 – 5)	Impact (1 – 5)	Total Score (L * I)	Proposed Mitigation for Sprint 2
R01	IT risks	Minor changes in the code will affect the work.	3	4	7	Prepare beforehand to avoid future issues.
R02	Project Management	Sometimes no clear communication from team.	2	3	5	Make sure everyone knows what they need to do before we leave meeting.
R03	Technical	Using too complex code.	4	1	5	Organise the code that I will use.
R04	Operational	Illness/Burnout	3	3	6	Share work among each other to help out.
R05	UX/Design	Based on personal taste, might not be user friendly.	4	4	8	Make sure the app is friendly to users before starting to work on it.

Risk Score = Likelihood x Impact = 15 x 15 = 225

1 - 4 (Low): Monitor.

5 - 12 (Medium): Needs a Plan.

15-25 (High): Requires immediate mitigation or test plan.
